Lauriston Girls' School, 38 Huntingtower Rd, Armadale VIC 3143

Program

5.00pm Registration & Networking
5.30pm Welcome & Alliance Business
5.40pm Presentation
7.00pm Close

Cost: Members \$30
Non-members: \$65

Book online: www.agsa.org.au/event/

Are our girls ready to play the STEMM Hunger Games?

The Hunger Games' STEM-related content in genetics, probability and environmental sciences, and the story's strong young protagonist in Katniss Everdeen, sets the scene for a discussion on the realities of STEM careers and the motivated abilities girls need to have to survive and excel in these challenging environments. Convergence science, the changing nature of work, the cult of entrepreneurship and the role of the humanities in the emergence of new industries is shaping a STEM-landscape that is no longer science fiction. Are our girls equipped for these opportunities and what more do we need to do to level the playing field for them?

Come along to enjoy this fascinating talk, light refreshments and networking with colleagues.
